- » carrying handle size 90 x 20 mm
- » opening spacing 50 – 300 mm

### Surface treatment

- » print – flexographic print (up to 10 colours)
- » perforation easy open
- » ventilation holes
- » corona treatment

Wicket bags are designed for packaging paper hygiene products (especially toilet paper), bakery products (packaged pastries) and frozen food. Thanks to modern and ergonomic design elements (carrying handle), they ensure comfortable handling and high functionality in automated packaging.

The bags are designed to provide maximum protection for the contents. They are resistant to most common chemicals. They can be easily welded with heat, which guarantees a firm and reliable closure.

The bags are made of LDPE material, with the heat resistance of -50 °C to +85 °C. As the semi-finished product, film with the registered protected trade name of GRANOTEN® is used. The bags can be printed in up to 10 colours.

GRANOTEN®
