Dimensions

- ▶ width 200 mm
- ▶ length 280 mm
- ▶ thickness 0,010 mm

Color Design

- ▶ EKO black (from regranulate) with white print
- ▶ green with black print

DOG WASTE BAGS

Dog waste bags are the ideal solution for municipalities and cities that care about maintaining order in public places and parks. These bags are a practical and ecological choice for dog owners who, with their responsible approach, contribute to the cleanliness and improvement of the quality of the environment in cities and municipalities.

Films registered under the protected trademark **MIKROTEN®** are used as semi-finished products for the production of welded HDPE articles with a heat resistance from -50 °C to +110 °C.

ECO BLACK VARIANT WITH A PORTION OF REGRANULATE: A responsible approach to the environment

The ECO black variant of these bags contains a portion of regranulate, which ensures the effective use of recycled materials and reduces the consumption of primary raw materials. This product is a concrete example of the application of the principles of the circular economy, where waste is re-transformed into useful products, thereby reducing the burden on the environment.

The ECO black version of dog waste bags represents a modern solution that combines practicality, environmental responsibility and support for cleanliness in public spaces.
